BID # 2018-1
FOR THE PURCHASE AND DELIVERY
OF GASOLINE WITH ETHANOL & DIESEL FUEL

NOVEMBER 3, 2017
ADDENDUM 1

Page 1 of 2

We received the following questions regarding the bid listed above:

Question #1: Please provide a copy of a recent invoice and/or bill of lading.

Answer #1: Please see attached recent copies of invoices and/or bill of lading.

Question #2: What is the estimated annual volume for each delivery location?

Answer #2: Estimated annual volume for each delivery location is as follows:

Location:	Joliet (Laraway)	Caton Farm	Monee	Estimate
Unleaded:	200,000	70,000	30,000	300,000
Diesel:	50,000	15,000	20,000	85,000

Question #3: Should both the Illinois UST and Federal UST tax be included in the Underground Storage Tax line?

Answer #3: Only list Illinois UST on the tax line. Please include Federal UST taxes in price of fuel per gallon.

Question #4: Should both the Illinois Environmental Fee and the Federal Oil Spill fee be included in the Environmental Impact fee line?

Answer #4: Only list the Illinois Environmental Fee on the fee line. Please include Federal Oil Spill fee in price of fuel per gallon.

**BID # 2018-1
FOR THE PURCHASE AND DELIVERY
OF GASOLINE WITH ETHANOL & DIESEL FUEL**

**NOVEMBER 3, 2017
ADDENDUM 1**

Page 2 of 2

Question #5: Is your use of gasoline each month fairly consistent or does it fluctuate considerably?

Answer #5: Please see attached usage reports for all three (3) locations, by fuel type.

Question #6: Is your use of diesel each month fairly consistent or does it fluctuate considerably?

Answer #6: Diesel fluctuates considerably dependent upon the weather. Consumption is directly related to snow and freezing weather as most, if not all, trucks are mobilized to clear and deice roadways. Please see attached for usage report for all three (3) locations, by fuel type.

Question#7: Please provide monthly estimate of gallons by product if available.

Answer #7: A monthly estimate for WCDOT Diesel fuel use varies upon the weather. From mowing to snow plowing, ditching to sweeping, etc. an accurate monthly estimate would be extremely difficult to produce. Please see attached for usage report for all three (3) locations, by fuel type.

Question #8: Have any addendums been released for this bid?

Answer #8: This is the first and only addendum issued for this bid. No additional questions will be accepted or answered for this bid, as it is due on Thursday, November 9, 2017 by 9:00 a.m.

Question #9: If we cannot attend the bid opening, how and when will we be notified of the low bidder and when will we receive a copy of the bid tabulations?

Answer #9: We will email copy of bid tabulation on or after 2:00 p.m. on Thursday, November 9, 2017 to distribution list we have on file, including any potential bidders who sent in questions.

Question #10: On a firm bid we would like to have a name and contact number for someone that can inform us of the low bidder as soon as possible.

Answer #10: Request for low bidder must be emailed to rweiss@willcountyillinois.com on or after 2:00 p.m. on Thursday, November 9, 2017.

LIGHT OIL BILL OF LADING AND/OR PRODUCT RECEIPT

NOT NEGOTIABLE

FOR CHEMICAL EMERGENCY SPILL, LEAK, FIRE EXPOSURE OR ACCIDENT CALL CHEMTREC 800-424-9300 CITGO Petroleum Corp CCN 4886

SEE EMERGENCY RESPONSE, HEALTH AND PHYSICAL HAZARDS

If or when this instrument constitutes a Bill of Lading, the property described below, in apparent good order, is received by the carrier shown herein, which carrier agrees to transport to the consignee and destination shown herein subject to the terms and conditions of the special contract between the carrier and the consignor in effect on the date of the issue of this Bill of Lading. In the absence of a special contract, transportation will be subject to all the terms and conditions of the carrier's tariffs legally on file. It is further agreed by the carrier that the transportation of this shipment will be performed in compliance with all applicable Rules, Regulations and Laws.

Any gasoline listed below is in compliance with the applicable standards for volatility in effect at the time of the product transfer and has been analyzed, except where otherwise noted, in accordance with requirements specified under Section 211 of the Clean Air Act.

This is to certify that the herein-named materials are properly classified, described, packaged, marked and labeled, and are in proper condition for transportation according to the applicable regulations of the Department of Transportation.

Except when indicated as Shipper, Supplier assumes no liability for freight and other charges. Shipper or its designee is liable for freight and other charges. Destination, if shown is designated by the Shipper.

EMERGENCY RESPONSE, HEALTH and PHYSICAL HAZARDS

GASOLINE...UN1203 (ALL GRADES) ETHANOL AND GASOLINE MIXTURE, GREATER THAN 10% ETHANOL...UN3475 DANGER! HIGHLY FLAMMABLE, HARMFUL OR FATAL IF SWALLOWED
FUEL OIL...NA1993 KEROSENE...UN1223 FUEL AVIATION...UN1863 (TURBINE ENGINE) DANGER! FLAMMABLE LIQUID, HARMFUL OR FATAL IF SWALLOWED
ETHANOL...UN1170 (DENATURED ETHANOL) DANGER! FLAMMABLE LIQUID, HARMFUL OR FATAL IF SWALLOWED. CANNOT BE MADE NON-TOXIC

POTENTIAL HAZARDS

FIRE OR EXPLOSION: •HIGHLY FLAMMABLE: Will be easily ignited by heat, sparks or flames. •Vapors may form explosive mixtures with air. •Vapors may travel to source of ignition and flash back. •Most vapors are heavier than air. they will spread along ground and collect in low or confined areas (sewers, basements, tanks). •Vapor explosion hazard indoors, outdoors or in sewers. •Runoff to sewer may create fire or explosion hazard. •Containers may explode when heated. •Many liquids are lighter than water.
HEALTH: •Fire may produce irritating, corrosive and/or toxic gases. •Vapors may cause dizziness or suffocation. •Runoff from fire control or dilution water may cause pollution.

PUBLIC SAFETY (CALL EMERGENCY RESPONSE TELEPHONE NUMBER 800-424-9300)

•Isolate spill or leak area immediately for at least 25 to 60 meters (80 to 160 feet) in all directions. •Keep unauthorized personnel away. •Stay upwind. •Keep out of low areas. •Ventilate closed spaces before entering.

PROTECTIVE CLOTHING: •Wear positive pressure self-contained breathing apparatus (SCBA). •Structural firefighters' protective clothing will only provide limited protection.

EVACUATION: •Large Spill: •Consider initial downwind evaluation for at least 300 meters (1000 feet). •FIRE: If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

EMERGENCY RESPONSE

FIRE: CAUTION: All of these products have a very low flash point: Use of water spray when fighting fire may be inefficient. •Small Fires: •Dry chemical, CO2, water spray or regular foam. Alcohol resistant foam is required for ethanol (Denatured Alcohol) and ethanol and gasoline mixtures. •Large Fires: Water, spray, fog or foam. •Do not use straight streams. •Move containers from fire area if you can do it without risk. •Fire Involving Tank or Car / Trailer loads: Fight fire from maximum distance or use unmanned hose holders or monitor nozzles. •Cool containers with flooding quantities of water until well after fire is out. •Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank. •ALWAYS stay away from the ends of tanks. •For massive fire, use unmanned hose holders or monitor nozzles: if this is impossible, withdraw from area and let fire burn.

SPILL OR LEAK: •ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). All equipment used when handling the product must be grounded. •Do not touch or walk through spill material. •Stop leak if you can do it without risk. •Prevent entry into waterways, sewers, basements or confined areas. •A Vapor suppressing foam may be used to reduce vapors. •Absorb or cover with dry earth, sand or other non-combustible material, transfer to containers. •Use clean non-sparking tools to collect absorbed material. •Large Spills: •Dike far ahead of liquid spill for later disposal. •Water spray may reduce vapor; but may not prevent ignition in closed spaces.

FIRST AID: •Move victim to fresh air. •Call emergency medical care. •Apply artificial respiration if victim is not breathing. •Administer oxygen if breathing is difficult. •Remove and isolate contaminated clothing and shoes. •In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes. •Wash skin with soap and water. •Keep victim warm and quiet. •Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
