# **SCOPE OF WORK**

## **Furnish, Install & Commission Cooling System for Server Room At the Will County Adult Detention Facility**

### **SECTION A: EXECUTIVE SUMMARY**

#### **A.1 Background:**

The Will County Sheriff's Office requires a new cooling system for the server rooms and master control at the Adult Detention Facility. This cooling system keeps all the servers that are essential for the operation of the ADF from overheating. The existing system currently has 6 separate 5-ton units to cool the server room. There are currently 3 units that are functional and in constant need of repair. The way the system was designed makes it extremely hard if not impossible for maintenance to be performed. The air handlers are in the ceiling of the server room, and above all the server racks, and wiring. The units that were originally installed are for freezers, not for cooling. The scope of work is demo the old units and install two new 15 cooling ton roof top units. Each 15 ton roof top unit will meet the cooling requirements for the server room and master control. The units will be easily accessible from the roof which makes it easy to maintain.
